PRESS RELEASE: ANON and Hosting Studio release a one-click masternode solution!

Northampton, 24 September 2018

ANON and Hosting Studio Services by Computer Studio Ltd. are excited to announce that they have reached a partnership agreement for immediate release of a one-click installation of masternode VPS servers!

Hosting Studio will be the official partner for ready-made VPS packages with the ANON masternode build pre-installed and tweaked for optimal use, thus eliminating the need for the VPS user to manually build everything themselves.

ANON Masternode VPS servers by Hosting Studio will also be delivered with an easy-to-run script and full instructions to automatically download, extract and incorporate in the masternode installation the latest official bootstrap file version available so that the masternode will only need to synchronize a small fraction of the blockchain, thus being ready to earn money quicker for you!

*Additionally, all ANON masternode users who purchase either a GOLD or PLATINUM ANON masternode package will receive a **RECURRING 15% discount** simply by entering the coupon code ANONMASTERNODE when ordering.*

All ANON VPS masternode packages offered by Hosting Studio feature high quality quadcore / 8 threads servers, unlimited traffic, unlimited antiDDOS protection and are located in a state-of-the-art datacenter with a backbone of superfast connections that ensure an incredible uptime of 99.99%!

Hosting Studio will continue to work hand-in-hand with the ANON development team to ensure that future updates of the ANON software will be quickly incorporated in the installation scripts in order to offer an up-to-date installation at all times.

We are confident that this partnership will enhance the great services already offered by ANON and will contribute to give ANON the widespread adoption and popularity it deserves.
